

Which would **YOU** rather use?

***You'd pick the tool that's faster,
easier, does a better job, and
increases productivity, wouldn't you?***

So why are you still choosing the old tools of topsoil or compost for your revegetation plan? **Biotic Earth Biotic Soil Amendment** is the better way to improve your soil to achieve vegetation success!

1. Drastically increase your soil's water holding capacity.
2. Reintroduces the "missing piece" of microbial soil life – the real difference between dirt and soil!
3. Weed/Seed Free – Vital to ensure only desirable species on your site.
4. Proven results/longest successful track record in the industry.
5. Easy to specify and inspect due to consistent application rate.
6. Less expensive than using topsoil, compost or another BSA on the market.
7. Faster and more successful closeout for projects. Achieve faster notice of termination on your project.

***Why use the old tool/techniques
for soil improvement when there is
an improved better way of doing it?***

**Biotic Earth achieves
419% increase in plant mass
per ASTM D 7322!**
